

Cookies

An HTTP cookie (also called web cookie, Internet cookie, browser cookie, or simply cookie) is a small piece of data sent from a website and stored on the user's computer by the user's web browser while the user is browsing.

- SameSite Cookies

SameSite Cookies

[web.dev](#) has a very insightful article on SameSite cookies. Read it to understand how they work.

| Value | Intended Use | Example |
|-----------------|---|-----------------------|
| SameSite=Lax | Functionality affecting the display of the site. Includes first request. | Theme switcher |
| SameSite=Strict | Relating to actions the user initiates. From second request. | Password change |
| SameSite=None | Functionality affecting the embedding of the site content. Cookies with SameSite=None must also specify Secure, meaning they require a secure context. | Watch it later button |
| - | Legacy. Cookies without a SameSite attribute will be treated as SameSite=Lax. | - |
