Static redirection

Inside a server block:

```
# use ~* to match a string inside a hostname
if ($host ~* 'living') {
  # temporary redirect
rewrite  ^/rewrite-test$  $scheme://$host/rewrite-test.html  redirect;
  # permanent redirect
rewrite ^/wp-content/uploads/2020/06/contact-us-button.png$
$scheme://$host/uploads/sites/3/2022/11/contact-us-button.png permanent;
}
```
