Nonces

- WordPress nonces are not cryptographic nonces, as the latter are used only once, and the former are not:

```
*/
function wp_nonce_tick() {
    /**
     * Filters the lifespan of nonces in seconds.
     *
     * @since 2.5.0
     *
     * @param int $lifespan Lifespan of nonces in seconds. Default 86,400 seconds, o
     */
    $nonce_life = apply_filters( tag: 'nonce_life', value: DAY_IN_SECONDS );

    return ceil( value: time() / ( $nonce_life / 2 ) );
}
lif:
```

$nonce_life mixed

> " Nonces are regenerated every 12h, but are valid for 24h, hence that code. (12h = 1 tick, and they're valid for two ticks)
